EFFICACY

Athena[®] IPM is an effective treatment against many soft-bodied insects such as white fly, spider mites, and aphids. Will treat adults, nymphs, larvae and eggs. Kills on contact. Also effective in treating common fungal infections such as powdery mildew.

DIRECTIONS FOR USE

Athena[®] IPM is for use on all crops, including tobacco and hemp. Recommended for indoor (commercial facilities, greenhouses, etc.) and field use.

Curative: Mix 120 mL Athena[®] IPM per gallon (31.7mL/L) of water. Spray with lights off or in early morning sun. Start with a lower dose then increase if problem persists. At least 3 applications spaced 3 days apart are required to treat most pests. Spray tops and underside of all leaves and stems to completely saturate the plant.

Preventative: Mix 90 mL Athena[®] IPM per gallon (23.8mL/L) of water. Spray with lights off or in early morning sun. Apply 2-3 times per week for maximum results. Spray tops and underside of all leaves and stems to completely saturate the plant.

Root Drench: Mix 40 mL Athena[®] IPM per gallon (10.6mL/L) of water. Saturate media completely until slight runoff. Compatible with all fertilizers and additives.
