

Greenhouse Edibles Program

Bacterial, Fungal and Algae Prevention

Apply ZeroTol® 2.0 to control Botrytis, Powdery Mildew, blights and spots or use to control root zone pathogens by applying to the nutrient reservoir tanks.

Application Method	Dilution Rate	Application Interval
Foliar Spray	1:100 Curative	5 days
	1:300 Preventative	
Hydroponics	1:2,000–1:10,000	

Systemic Pathogen Control

Apply OxiPhos® to control *Pythium*, *Phytophthora* and Downy Mildew.

Application Interval	Foliar Rate	Drench Rate
14 days	1:100 Curative	1:1,000
30 days	1:300 Preventative	

Broad Range Insect Control

Use AzaGuard® to control foliar and soil-borne pests. Apply AzaGuard to control fungus gnats, thrips, mites, whiteflies, aphids, mealybugs and more.

Preventative Rate	Curative Rate	Application Interval
8–10 fl. oz./100 gallons	16 fl. oz./100 gallons	7 days

Rooting Health

Drench TerraGrow® to saturation to initiate rooting, increase stress tolerance and enhance growth.

Application Method	Application Rate	Application Interval
Hydroponics	1–5 oz./100 gallons	10–14 days
Soil Drench		30 days
