

SOLARXTREME

Introducing SolarXtreme from California Lightworks. This new series of full spectrum LED grow lights uses a revolutionary new generation of COB (chip on board) as well as new direct AC drive technology which eliminates the need for LED drivers. This offers high efficiency LEDs at a much lower cost than traditional LEDs. The SolarXtreme series is designed especially for grow tents and smaller scale home growing. The new COB LED design from California Lightworks also offers the ideal full spectrum for all phases of growth – available in three different power levels:

SOLARXTREME 1000

SX 1000

SOLARXTREME 1000

The SolarXtreme 1000 covers up to a 5 X 5 canopy area and draws 800 watts.

SOLARXTREME 500

SOLARXTREME 500

The SolarXtreme 500 covers up to a 4 X 4 canopy area and draws 400 watts.

SX 500

SOLARXTREME 250

SX 250

SOLARXTREME 250

The SolarXtreme 250 covers up to a 3 X 3 canopy area and draws 200 watts.
