

Kleanse

Cyco Platinum Series Kleanse is a salt clearing agent that is formulated to solubilize most micronutrients, cationic nutrients, or metals in a growing environment.

Kleanse can be utilized during the growth and bloom period to clean the root system from accumulated mineral salts.

Kleanse also feeds the microbial life in the substrate by supplying needed carbohydrates.

CONTAINS NONPLANT FOOD INGREDIENTS:

Active ingredients:

4% Sugar (Dextrose) (Microbe Food)

2% Citric Acid

94% Total other ingredients (as nonplant food)

Between nutrient solution changes:

Mix 1-2ml per liter (Quart) of water, use 1ml (1/4 tsp) solution for younger or fragile plants. Use 2ml (1/2 tsp) solution for mature plants close to harvest.

Final Kleanse before harvest:

Drain old nutrient solution and discard.

Refill reservoir with fresh water and add 3-5ml of Kleanse per liter of water. Run this solution for the last two days before harvest.

Directions:

Use 1-2 ml (1/4 - 1/2tsp) per Liter (Quart)
100 ml (3.5oz) per 100 Liters (25 Gallons)
Use in flush stage throughout the cycle and prior harvest.

Ajoutez à la solution nutritive à raison de 1-2 ml par litre. Utilisation en phase de rinçage au cours du cycle.

Geben Sie 1-2 ml pro Liter Nährlösung hinzu. Verwenden Sie in UP Bühne während des gesamten Zyklus.

Agregue a la solución de nutrientes a razón de 1-2 ml por litro. Utilice en la etapa de descarga en todo el ciclo.

Pha dung dịch dinh dưỡng theo tỉ lệ 1-2 ml lít. Sử dụng trong giai đoạn tưới ra trong suốt chu kỳ.
