**Procedure:**

Contain, collect and reuse, if possible. This product is not considered a hazardous product, and is therefore not considered a hazardous waste. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

**Personal Protection:**

Respiratory Protection: Approved NIOSH/MSHA (nuisance dust) respirator may be necessary under certain conditions where airborne contaminants may exceed exposure limits.

Eye Protection: Wear goggles or safety glasses with side shields at all times.

Other Protective Equipment: Impervious gloves, long sleeve pants and shirts, and protective head-wear should be worn to minimize exposure.

## **SECTION 7: HANDLING AND STORAGE**

**Storage Conditions:**

The maximum recommended storage temperature for this product is 160°F. Store in a well ventilated area.

**Handling Procedures:**

Avoid ignition sources such as sparks and flame. No special precautionary health measures should be needed under anticipated conditions of storage or use. As a water based product, general incompatibility with hydrocarbon oils are expected. However, no reaction (hazardous or otherwise) is expected on contact with other materials.

## **SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION**

**Exposure Limit Information:**

The use of local exhaust ventilation is recommended to control process emissions near source. Provide mechanical ventilation of confined spaces

### **Respiratory Information:**

A respiratory protection program meeting OSHA 29 CFR & 1910-134 and ANSI Z88. Two requirements must be followed whenever work place conditions warrant a respirator's use.

### **Eye Protection:**

Use Chemical splash goggles and face shield (ANSI Z87.1 or approved equivalent). Eye protection worn must be compatible with respiratory protection system employed.

### **Hand Protection:**

NOTE: Material may be a skin sensitizer in susceptible individuals. The gloves listed below may provide protection against permeation. Gloves of other chemically resistant materials may not provide adequate protection:

- Butyl Rubber
- Nitrile

Gloves should be removed and replaced immediately if there is any indication of degradation or chemical breakthrough. Rinse and remove gloves after use. Wash hands with soap and water.

### **Other Protection:**

Use a chemically resistant apron or other impervious clothing to avoid prolonged or repeated skin contact.

### **Engineering Controls (Ventilation):**

Use local exhaust ventilation with a minimum capture velocity of 150 ft. /min. (0.75 m/sec.) at the point of dust or mist evolution. Refer to the current edition of *Industrial Ventilation: A Manual of Recommended Practice*, published by the American Conference of Government Industrial Hygienists for information on the design, installation, use, and maintenance of exhaust systems.

### **Other Protective Equipment:**

Facilities storing or utilizing this product should be equipped with an eyewash facility and safety showers.
