

**KAYA
COIR®**

HIGH QUALITY GROWING MEDIUM

PRODUCT BROCHURE

At Kaya Coir, we specialize in providing premium RHP certified coconut-based substrates crafted for optimal plant cultivation. We partner with traditional farmers to source the highest quality raw materials. These materials are processed with a focus on sustainability, utilizing renewable energy sources and recycled reverse osmosis (RO) water to minimize environmental impact.

We prioritize the retention of essential natural minerals throughout our production pipeline, harvesting directly from the trees to maintain integrity. Quality control is paramount, with every phase of our manufacturing adhering to stringent RHP certification standards. Our in-house laboratory conducts continuous analysis, monitoring key parameters such as pH levels, EC, and moisture content in coco to guarantee consistent excellence in our growing media.
