

The Twister Trim Saver™

The Trim Saver™ from Twister® is a revolution in trim collection and preservation for Twister leaf trimmers. An industry first, the Trim Saver uses radial cyclone technology to generate airflow from a vacuum, effectively bypassing the vacuum impeller to deliver the greatest production possible without damaging your trim.

Cyclonic Design

An industry first, the Trim Saver™ uses radial cyclone technology to collect your valuable trim, effectively bypassing the impeller used in traditional vacuum-based trim collection systems.

Simple Operation

The Trim Saver™ is truly plug-and-play. Simply connect the vacuum hose to the trimmer and hit the power switch. It's that simple.

Industry Best Trim Quality

Whether using WET or DRY, the Trim Saver™ provides maximum separation efficiency of trim, collecting over 99% of your product in an easy-to-empty collection bin beneath the cyclone.

Easy to Clean

Designed from the ground up for easy disassembly and cleaning, the Trim Saver™ comes with a removable "trim collection bin", allowing for quick 2 minute wipedowns between trim sessions.
