

Ventana Plant Science

hello@ventanaplant.science - [instagram.com/ventanaplantscience/](https://www.instagram.com/ventanaplantscience/)

Thank you for your interest in Radix, the laboratory grade plant rooting stimulator. Radix has been carefully developed to include humic, fulvic, amino acids, protein hydrolysate, and a few other proprietary ingredients that act as beneficial natural biostimulants.

At Ventana Plant Science we develop nutrients that will pass laboratory testing by manufacturing without toxins, non-food safe chemicals, and heavy metals. Some nutrient companies source their input materials from sources that can have inconsistent quality and/or have non-safe ingredients. At Ventana Plant Science we hold ourselves to the highest standards of quality possible.

Radix: taking the guesswork out of what you put in your plants.

INGREDIENTS INCLUDES BUT NOT LIMITED TO:

Aspartic acid	Proline	Isoleucine
Humic acid	Sulfur	Leucine
Nitrogen	Glycine	Manganese
Phosphate (P2O5)	Alanine	Tyrosine
Threonine	Cystine	Phenylalanine
Cobalt (total)	Magnesium	Lysine
Potash (K2O)	Sodium	Histidine
Serine	Valine	Arginine
Boron	Methionine	Tryptophan
Copper	Zinc	
Glutamic acid	Calcium	

DEVELOPED TO HAVE NO NON-BENEFICIAL HEAVY METALS:

Arsenic

Cadmium

Lead

Mercury

Molybdenum

Nickel

Selenium

Manganese
