

GREENHOUSE GROWING

CROP

Cannabis Sativa

GROWING MEDIA

Sunshine Mix #4

STRAIN

Poco Loco

LOCATION

Canada

OBJECTIVE

Measure the effect of adding FlaVUH

TREATMENTS

A. Valenza Nutrients

B. Valenza Nutrients with FlaVUH

PLANTS TESTED

30 plants total

TRANSITION DETAILS

Cuttings > 2.5" Square Pot > 1.55 gallon black pot

DATA ANALYSIS

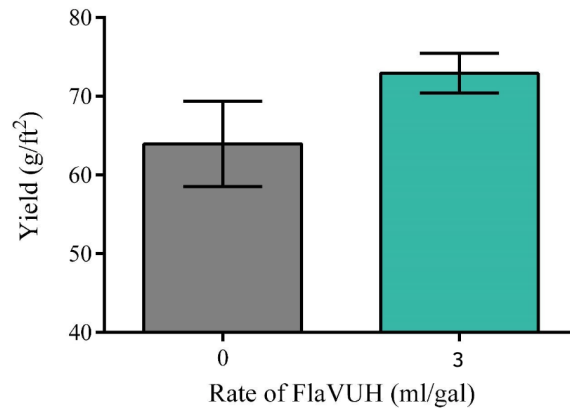

06/17/2022

YIELD

TREATMENT	Yield (g/ft ²)
Treatment A	64
Treatment B	73
Increase	14%

FlaVUH supplementation increased yield by 14% compared to the untreated control

Response of cannabis yield per unit area to FlaVUH supplementation.

NOTE FROM THE SCIENTIST:

In my experience trialling many cannabis nutrient supplements in commercial and research settings, it's been rare to find one that works; especially one that works well enough to make up for the added cost of using it. In our research team's independent, controlled trial using FlaVUH, we identified improvements to plant growth rates and yield that far outweighed the input cost. For those looking to boost their yield and growth rates, FlaVUH can be a great tool.
